

KEERTHI KOLLA

Hyderabad, India | +91-9347599815 | saikeerthi967@email.com

PROFESSIONAL SUMMARY

Certified System Architect (CSA) with 2+ years of experience delivering enterprise workflow automation and digital transformation solutions across Healthcare and Dispute Management domains. Experienced in collaborating with business stakeholders, product owners, and cross-functional teams to analyze requirements, support solution discussions, and contribute to Agile delivery. Strong expertise in Case Management, Constellation architecture, REST integrations, reusable API frameworks, workflow orchestration, and process optimization. Proven ability to bridge business and technical teams while delivering scalable and client-focused automation solutions.

TECHNICAL SKILLS

Domains: Healthcare, Dispute Management, Workflow Automation

Platform Expertise: PRPC 8.x, Constellation Architecture, Case Management, GenAI Integrations, DOC AI, Knowledge Buddy, UI Modernization

Technical Expertise: Data Pages, Data Transforms, Activities, Decision Rules, Declarative Processing, Queue Processors, Data Flows, Report Definitions, Virtual Report Definitions, File Listeners, Collection Rules

Integration & Architecture: Service REST, Connect REST, Reusable API Frameworks, Third-party Integrations, Workflow Automation

Consulting & Collaboration: Stakeholder Management, Requirement Gathering, Agile Delivery, Solution Discussions, Technical Workshops, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Pegasystems — Associate Applications Engineer

Project: Smart Claims Engine (SCE) | Domain: Healthcare

Aug 2025 – Present | Hyderabad, India

- Collaborated with business stakeholders and product owners to evaluate healthcare workflows and translate functional requirements into scalable automation solutions.
- Facilitated sprint demos, requirement clarification sessions, and technical walkthroughs across Agile delivery teams.
- Engineered enterprise healthcare workflows using case management capabilities, improving operational visibility and workflow orchestration.
- Optimized data processing and business logic utilizing Data Pages, Data Transforms, Activities, Joins, Associations, and Subreports.
- Developed and orchestrated REST-based integrations, including service APIs, Queue Processors, File Listeners, and Collection Rules.
- Designed Virtual Report Definitions and reporting capabilities to streamline enterprise search and data retrieval operations.
- Implemented Constellation capabilities such as Data References and Case References for scalable UI architecture.
- Spearheaded UI modernization initiatives by migrating application capabilities from UI Kit to Constellation.
- Re-engineered unsupported legacy functionalities for Constellation compatibility, reducing redevelopment effort by 30%.

- Integrated DOC AI and Knowledge Buddy (RAG-based solution) to improve intelligent document retrieval and contextual assistance.
- Diagnosed platform-level issues impacting application stability and collaborated with engineering teams to drive resolutions.
- Contributed to architecture reviews, EPIC grooming sessions, and Proof of Concepts (POCs) for modernization initiatives.

Project: Smart Dispute (Agentic Automation) | Domain: Dispute Management

Aug 2024 – Jul 2025 | Hyderabad, India

- Partnered with stakeholders and engineering teams to design scalable dispute management workflows aligned with business objectives.
- Implemented end-to-end case lifecycle orchestration using Constellation architecture, improving workflow consistency and maintainability.
- Built reusable automation components leveraging Data Pages, Data Transforms, Activities, and Decision Rules.
- Integrated third-party dispute management services with Ethoca through REST-driven communication mechanisms.
- Architected a reusable API integration framework to standardize onboarding of external services and improve maintainability.
- Designed reusable API orchestration flows that reduced new integration development effort by approximately 40%.
- Automated workflow routing and decisioning processes using declarative and rule-driven processing techniques.
- Supported Agile execution through sprint planning, peer reviews, technical solution discussions, and stakeholder interactions.
- Collaborated with cross-functional teams to establish reusable architecture patterns and streamline workflow optimization initiatives.
- Streamlined dispute processing workflows, reducing manual intervention and improving automation efficiency.

EDUCATION

Vellore Institute of Technology (VIT), Chennai
Integrated M.Tech in Software Engineering

CERTIFICATIONS

- Pega Certified System Architect (CSA)

ACHIEVEMENTS

- Architected reusable API orchestration frameworks that accelerated onboarding of external integrations by 40%.
- Drove modernization initiatives involving migration from legacy UI frameworks to Constellation architecture.
- Identified and resolved critical platform-level limitations, improving application stability and user experience.
- Recognized for active participation in stakeholder discussions, Agile ceremonies, and enterprise solution design workshops.
