KOLLA S V D N S KEERTHI

Hyderabad, India | +91-9347599815 | saikeerthi967@email.com

PROFESSIONAL SUMMARY

Analytics-focused professional with 2+ years of experience at Pegasystems in operational reporting, business analysis, data validation, KPI monitoring, and stakeholder engagement. Hands-on experience with Advanced Excel, Python (Pandas, OpenPyXL), and analytical reporting, including data cleaning, reconciliation, exception analysis, and operational performance evaluation. Knowledge of SQL, Power BI, DAX, Power Query, exploratory data analysis, descriptive statistics, hypothesis testing, correlation, regression, and time-series analysis. Experienced in translating business requirements into KPI definitions, reporting specifications, and actionable insights. Strong analytical, problem-solving, and communication skills, with a focus on improving reporting accuracy and operational decision-making.

TECHNICAL SKILLS

Programming & Data Analysis: Python, SQL, Pandas, NumPy, OpenPyXL, Data Cleaning, EDA, Data Validation, Data Reconciliation

Business Intelligence: Power BI, Power Query, DAX, Dashboard Requirements, KPI Definition, Data Visualization, Operational Reporting

Advanced Excel: Pivot Tables, Pivot Charts, XLOOKUP, VLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS, Conditional Formatting, Data Validation, Excel Reporting

Statistical Techniques: Descriptive Statistics, Mean, Median, Standard Deviation, Percentiles, Hypothesis Testing, Confidence Intervals, Correlation, Regression, Time-Series Analysis

Business Analytics: Trend Analysis, Variance Analysis, Root-Cause Analysis, SLA Monitoring, Case Aging, Performance Analytics, Stakeholder Reporting

PROFESSIONAL EXPERIENCE

Pegasystems - Associate Applications Engineer - August 2024 – Present | Hyderabad, India

Global Client Support (GCS) – Operational Performance Analytics

- Proposed project experience — confirm assignment and responsibilities
- Analyzed incident and Expert Assistance case data to evaluate case inflow, backlog aging, resolution times, and operational performance across support teams.
- Developed SQL queries using joins, CTEs, aggregations, and window functions to prepare incident-level datasets and calculate operational KPIs.
- Performed exploratory data analysis using Python and Excel to examine case distributions, missing values, outliers, and recurring incident patterns.
- Applied descriptive statistics, including mean, median, standard deviation, and percentile analysis, to assess resolution-time variability and identify unusually long-running cases.
- Evaluated differences in case resolution performance using statistical hypothesis testing, confidence intervals, and correlation analysis.
- Prepared Excel-based KPI scorecards and operational reports using Pivot Tables, Pivot Charts, XLOOKUP, SUMIFS, COUNTIFS, and conditional formatting.
- Developed interactive Power BI dashboards using DAX, Power Query, slicers, and drill-through features to monitor case volumes, resolution trends, and backlog performance.
- Communicated operational insights and recommendations to stakeholders to support data-driven decisions.

Launchpad Usage Analytics – Business Intelligence & Reporting

- Proposed project experience — confirm assignment and responsibilities
- Analyzed application usage data across providers, subscribers, and applications to evaluate service consumption, adoption trends, and user engagement.
- Used SQL queries with joins, CTEs, and aggregations to calculate provider-level usage, subscriber activity, and application consumption metrics.
- Performed data cleaning and exploratory analysis using Python, Pandas, and NumPy to identify duplicate records, missing values, and unusual usage patterns.

- Applied descriptive statistics, correlation analysis, and statistical comparisons to examine differences in usage behavior across application and provider segments.
- Conducted cohort and time-series analysis to evaluate subscriber engagement, historical consumption patterns, and month-over-month usage trends.
- Created Excel-based analytical reports using Pivot Tables, XLOOKUP, SUMIFS, COUNTIFS, and Power Query to consolidate usage metrics and support ad hoc analysis.
- Developed Power BI dashboards and DAX measures to visualize usage trends, provider activity, subscriber engagement, and application consumption.
- Validated reporting metrics through SQL and Excel reconciliation and communicated analytical findings to business stakeholders.

EDUCATION

Vellore Institute of Technology (VIT)|Vellore Integrated M.Tech in Software Engineering

CERTIFICATIONS

- Pega Certified System Architect (CSA)

ACHIEVEMENTS

- Contributed to analytics-enabled workflow improvements by using Excel, Power BI-ready mappings, and Python-based data validation to support stakeholder reviews and delivery decisions.
- Improved integration delivery efficiency by helping standardize reusable implementation patterns for external dispute services.
- Supported modernization and operational reporting initiatives by translating business needs into structured requirements, KPI logic, and dashboard-ready reporting attributes.
- Recognized for active participation in stakeholder discussions, Agile ceremonies, ticket triage, and solution walkthroughs.
