KOLLA S V D N S KEERTHI

Associate Engineer | Aspiring Ad Operations Analyst

+91-9347599815 | saikeerthi967@gmail.com | Hyderabad, India | Experience: 2 Years 2 Months

PROFESSIONAL SUMMARY

Results-driven consulting and business operations professional with 2+ years of corporate experience across healthcare and financial services, specializing in business process transformation, operational excellence, performance analytics, and solution delivery. Skilled in stakeholder management, client engagement, requirements gathering, and translating complex business challenges into scalable, data-driven solutions. Proven ability to collaborate with cross-functional teams, optimize business workflows, analyze operational performance, and deliver actionable insights that improve efficiency and business outcomes. Proficient in business analysis, KPI monitoring, reporting, and strategic problem-solving, with a **strong interest in pursuing a career in Digital Advertising and Ad Operations**. Passionate about leveraging analytical expertise, operational experience, and a data-driven mindset to contribute to campaign performance analysis, advertising operations, and continuous performance optimization.

SKILLS

Data Analytics & Reporting: Advanced Excel, SQL, Power BI, Python, Data Validation, KPI Monitoring, Performance Reporting, Trend Analysis

Business Operations & Consulting: Process Optimization, Root-Cause Analysis, Stakeholder Management, Client Engagement, Requirements Gathering, Cross-Functional Collaboration, Operational Excellence

Digital Advertising & Marketing Knowledge: Ad Operations Fundamentals, Campaign Performance Metrics (CTR, CPC, CPM, CPA, ROAS), Campaign Monitoring Concepts, Budget Pacing, Audience Segmentation, A/B Testing Fundamentals, Conversion Funnel Analysis

WORK EXPERIENCE

Associate Engineer - Pegasystems **Aug 2024 - Present**

- Collaborated with business stakeholders and product owners to evaluate and optimize end-to-end healthcare claims workflows.
- Translated operational requirements into scalable automation, analytics, and reporting solutions; facilitated requirement clarification sessions, sprint demos, solution walkthroughs, and stakeholder reviews.
- Managed comprehensive client ticket triage by assessing business impact, reproducing scenarios, identifying root causes in workflows, reporting, rule outputs, and data discrepancies.
- Coordinated resolution efforts with product, QA, engineering, and client-facing teams to ensure timely issue resolution.
- Developed Excel-based tracking tools to enable requirement traceability, scenario mapping, rule validation, defect aging, stakeholder feedback, ticket monitoring, and test result comparison.
- Defined Power BI dashboard requirements; prepared field mappings, source-to-target definitions, KPI logic, and reporting attributes to enhance claims operations reporting.
- Focused dashboard metrics on pended claims, status distribution, exception volumes, workflow aging, ticket trends, and operational bottlenecks.
- Presented product capabilities, business insights, and solution recommendations to clients and leadership, driving stronger stakeholder engagement and improved solution adoption.
- Mentored team members and championed continuous improvement and AI adoption initiatives, boosting team productivity by 20% and enhancing delivery quality.

Digital Advertising and AD operations – Professional learning

- Building foundational knowledge of digital advertising, including paid search, display advertising, social media advertising, native advertising, and programmatic advertising.
- Learning campaign management fundamentals, including campaign setup, audience targeting, ad placements, bidding strategies, and budget allocation.
- Studying advertising performance metrics such as CTR, CPC, CPM, CPA, conversion rate, and ROAS to understand campaign effectiveness.

- Exploring Google Ads, Meta Ads Manager, TikTok Ads, and Taboola to understand advertising platforms and campaign workflows.
- Developing knowledge of campaign performance monitoring, budget pacing, bid optimization, and audience segmentation.
- Learning A/B testing, creative performance analysis, conversion tracking, and attribution models to understand campaign optimization.
- Exploring marketing analytics, performance dashboards, and campaign reporting using Excel, SQL, and Power BI.
- Understanding Ad Operations processes, including campaign delivery monitoring, performance discrepancies, troubleshooting, and reporting accuracy.

PROJECTS

Smart dispute **13 Months**

- Led end-to-end Mastercard dispute resolution and chargeback prevention initiatives, managing the dispute lifecycle from case intake to resolution while ensuring alignment with business objectives and client requirements.
- Collaborated with global stakeholders, clients, business teams, and leaders to analyze business challenges, gather requirements, and recommended strategic solutions that enhanced operational efficiency and customer experience.
- Conducted workshops and requirements elicitation sessions for Ethoca programs, driving improvements in alert management, pre-dispute resolution, chargeback prevention, and operational reporting.
- Optimized complex business workflows including transaction disputes, alert handling, exception management, SLA, and chargeback resolution processes.
- Delivered product demonstrations, solution walkthroughs, and business capability presentations to clients and stakeholders, effectively translating complex requirements into actionable insights.

Smart claims engine **10 Months**

- Collaborated with business stakeholders, product owners, and operations teams to optimize end-to-end healthcare claims processing, including claim intake, validation, adjudication, adjustments, pend management, exception handling, and claim status tracking.
- Analyzed and managed healthcare claims data, such as ICD diagnosis codes, CPT/HCPCS procedure codes, event codes, provider, member, and benefit data to ensure alignment with operational and business objectives.
- Facilitated requirements workshops, stakeholder review sessions, sprint demos, and client discussions to align business needs with solution capabilities.
- Leveraged Document AI and AI-driven agents to automate document ingestion, information extraction, classification, and data validation, improving accuracy and reducing manual workloads.
- Defined key performance indicator (KPI) frameworks, reporting requirements, and operational metrics to support governance and executive decision-making.

EDUCATION

2024 M.Tech | Computers
Vellore Institute of Technology
Grade - 8.1/10

ACHIEVEMENTS

Achievements

- Improved integration delivery efficiency by helping standardize reusable implementation patterns for external dispute services.
  Recognised for active participation in stakeholder discussions, Agile ceremonies, ticket triage, and solution walkthroughs.
  Reduced manual effort by **30%** through AI-driven automation and document intelligence solutions.
- Improved operational efficiency and turnaround times by **15%** through process optimisation initiatives.
