- DevOps Tools (GitHub), (ADO)
- VS Code with Salesforce Extensions Pack
- Communication & Collaboration

Work History

Associate, 06/2025 to Current

Cognizant – Hyderabad

- Collaborated on Salesforce implementation, executing 10+ custom solutions (Apex, LWC, Flows) and providing support to 60+ end-users, reducing issue resolution time by 30%.

Application Development Associate, 01/2022 to 05/2025

Accenture – Hyderabad, India

- Developed and executed Salesforce solutions for 20+ Jira user stories, addressing critical production bugs and supporting 40+ post-release cases, which improved system reliability and reduced defect recurrence by 30%.

Education

B.Tech

Lendi Institute of Engineering - Visakapatnam

Intermediate: MPC, 05/2017

Narayana - Vizianagaram, India

X Standard: 05/2015

Chanakya Public School - Vizianagaram

Project

- Omnisia (SFDC Splunk), Developed an end to end Renewal Automation Flow from scratch. Client is Omnisia which is subsidiary of VM ware. Here we deal with the renewals of opportunity and creation of mid term opportunities. we work on the opportunity creation, updation and closure of it based on the quote price orders and also handle the failure cases., Worked on Apex Triggers, Trigger handler classes, Batch classes and used Apex test classes to increase the coverage to 90%., Performed Salesforce.com Administrative activities - Creating Profiles, Record Types, Page Layouts, Permission sets, Validation rules, flows, Custom Objects, Custom Fields creation and actively work on the deployments through Github., Developed custom Lightning Web Components (LWC) from scratch and Integrated LWC with Salesforce data using Apex controllers and the Lightning Data Service (LDS) for seamless data fetching and manipulation., Identified, debugged, and resolved production issues by conducting root cause analysis (RCA), ensuring minimal downtime and improved system reliability.
- Disney (Sales hub Project), Worked on custom Sales hub Application which was built on Sales Cloud. Performed Admin activities like customization of lightning web pages through Dynamic forms and implemented custom screen and record triggered flows., Developed and maintained Apex Triggers, Flows, and Test Classes to automate business processes and ensure code coverage in Salesforce., Worked on batch classes to process large volumes of records asynchronously, improving data processing., Utilized Custom Settings and Custom Metadata Types to manage application configurations and enable scalable, dynamic logic in Salesforce., Implemented integration processes to facilitate seamless data exchange between Salesforce and external systems, utilizing Rest APIs.

- Network Rail (Cognizant), Developed and enhanced Salesforce Screen Flows to establish seamless linkage between two key business objects, Improving data consistency and reducing manual intervention for end users., Implemented Roll-Up Summary functionality using Apex Triggers, enabling automatic calculation and aggregation of related record data where standard roll-up features were not applicable., Designed and optimized Flows for defect linking and unlinking processes, streamlining defect management and ensuring accurate relationship tracking between records., Collaborated closely with business users and QA teams to validate flow logic and trigger behaviour, ensuring smooth deployment and high system reliability., Provided production support post-go-live, resolving user-reported issues and fine-tuning automation to ensure stable performance and enhanced user satisfaction.

Certifications

- Salesforce Certified Administrator
- Salesforce Platform App Builder
- Salesforce Certified Platform Developer I
- Salesforce Sales Cloud Consultant
- Salesforce JavaScript Developer 1
