📍 Hyderabad

Associated applications engineer

Professional Summary

- A certified senior system architect with 2.5 years in software development and maintaining using the **PEGA** Rules Process Commander (PRPC 8.x) tool. Mainly involved on health care domain projects.
- **Pega Certified Senior System Architect (CSSA)**
- Involved in development of **Process Flows, Activities, Activity Step Methods, File Listener, Background processing** and **User Interface (UI)**.
- Experience in implementation of various PRPC components like **Collection, Decision Rules, Declarative Rules, Validation Rules** etc.
- Worked on **Connect rest** and **Service rest** api integration.
- Knowledge on PEGA Implementation Cycle which includes **development, testing** and **implementation**.
- Worked on **Pega constellation** and **DXAPIs**.
- Having hands on experience in **HTML, CSS** and **React.js**.
- Experience in creating Flow actions and developing rich UI's using **Harness, Layouts** and **Sections**.
- Good Knowledge on using debugging tools like **Clipboard, PAL** and **tracer**.
- Implemented **Pega Gen AI** and wrote custom components for constellation using react.
- Having little knowledge on Jenkins and debugged the issues.
- Analyzed and fixed various client issues.
- Good hands-on experience in **python** programming language.
- Willing to explore in learning different modules in development and a very fast learner and open to suggestions and recommendations.

Skills

- PEGA Rules Process 8.x
- SQL
- HTML, CSS, JavaScript
- React.js
- Java, Python
- PostgreSQL

Work Experience and Projects

Associate applications engineer.

Pega Jan / 2021 - Ongoing Hyderabad

Project: - Smart claims engine

- Proficient in Pega case management features, background processing and service rest.
- Experienced in configuring file listener, collection rules, report definitions and virtual report definitions.
- Worked on creation of virtual report definitions for Elastic search, Pega search and reporting service and implemented near real time indexer using indexer API.
- Good hands-on experience on declarative processing feature.
- Executed tasks related to activities, data transforms, joins, associations, and subreports.
- Successfully implemented virtual report definitions with advanced paging functionality.
- Integrated Pega Gen AI functionality.
- Executed XML parsing and Service REST API implementation.
- Leveraged pega explore data functionality into application.

- Coded using JSP to customize the login page.
- Worked on Pega Process AI and implemented data flows.
- Involved in various design discussions and POC of the EPICS.

Project: - Product composer system

- Worked on parsing excel, CSV files and mapping the respective data on to work object.
- Implemented on harness, section rules and flow actions.
- Executed intricate activities, focusing on OBJ-related methods for optimal system performance.
- Seamlessly integrated Pega Gen AI functionality, contributing to the project's artificial intelligence capabilities.
- Worked on background processing mainly on queue processor.

Project: Retro board

- Project involves integration of agile retro board into pega agile studio.
- Implemented POC of the project and collaborated with system architects regarding design issues.
- Implemented project in pega constellation environment and used pega custom components for building retro widget.
- Used HTML, CSS and React.Js to build constellation custom component.
- Implemented hooks and redux functionality of react as part of application.
- Worked on Pega PCore and PConnect APIs.

Certifications

- Pega Certified Senior System Architect
- Oracle certified associate, Java SE8 programmer
- Python for everybody specialization, coursera

Education

Bachelor of Technology in Information technology

VR Siddhartha Engineering College Jun / 2017 - Jun / 2021

Vijayawada
