

KEERTHI KOLLA

Hyderabad, India | +91-9347599815 | saikeerthi967@gmail.com

PROFESSIONAL SUMMARY

Pega Certified System Architect (CSA) with 2+ years of experience architecting and delivering enterprise-scale workflow automation solutions using Pega PRPC 8.x and Pega Constellation. Adept at driving consulting engagements through stakeholder collaboration, business requirement analysis, solution engineering, and Agile execution. Skilled in optimizing business processes using Case Management, REST integrations, reusable API frameworks, Data Pages, Data Transforms, and Decision Rules. Contributed to Healthcare and Dispute Management modernization initiatives by streamlining workflows, enhancing integration scalability, and improving operational efficiency.

TECHNICAL SKILLS

Domains: Healthcare, Dispute Management, Workflow Automation

Pega Technologies: Pega PRPC 8.x, Pega Constellation, Case Management, Pega GenAI, Pega DOC AI, Pega Knowledge Buddy, UI Kit to Constellation Migration

Technical Skills: Data Pages, Data Transforms, Activities, Decision Rules, Declarative Rules, Queue Processors, Data Flows, Report Definitions, Virtual Report Definitions, File Listeners, Collection Rules

Integration: Service REST, Connect REST, Reusable API Architecture, Third-party Integrations

Consulting Skills: Stakeholder Management, Requirement Gathering, Agile Delivery, Solution Design Discussions, Technical Mentoring, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Pegasystems — Applications Engineer

Project: Smart Claims Engine (SCE) | Domain: Healthcare

Aug 2025 – Present | Hyderabad, India

- Collaborated with business stakeholders and product owners to analyze healthcare workflows and translate functional requirements into scalable Pega solutions.
- Facilitated sprint demos, technical walkthroughs, and requirement clarification discussions across Agile delivery teams.
- Engineered enterprise healthcare workflows using Pega Case Management, improving operational visibility and process orchestration.
- Optimized data processing mechanisms utilizing Data Pages, Data Transforms, Activities, Joins, Associations, and Subreports.
- Developed and orchestrated REST-based integrations, including Service REST APIs, Queue Processors, File Listeners, and Collection Rules.
- Designed Virtual Report Definitions and reporting capabilities to streamline enterprise search and data retrieval operations.
- Implemented Pega Constellation capabilities such as Data References and Case References for scalable UI architecture.
- Spearheaded migration initiatives from UI Kit to Constellation, enabling modernization of enterprise applications.

- Re-engineered unsupported UI Kit functionalities for Constellation compatibility, reducing redevelopment effort by 30%.
- Integrated Pega DOC AI and Pega Knowledge Buddy (RAG-based solution) to improve intelligent document retrieval and contextual assistance.

Pegasystems — Associate Applications Engineer

Project: Smart Dispute (Agentic Automation) | Domain: Dispute Management

Aug 2024 – Jul 2025 | Hyderabad, India

- Partnered with stakeholders and engineering teams to design scalable dispute management workflows aligned with business objectives.
- Implemented case lifecycle orchestration using Pega Constellation, improving workflow standardization and maintainability.
- Built reusable automation components leveraging Data Pages, Data Transforms, Activities, and Decision Rules.
- Integrated third-party dispute management services with Ethoca using REST-driven communication mechanisms.
- Architected a reusable API integration framework to standardize onboarding of external services and improve maintainability.
- Designed reusable API orchestration flows that reduced new API development effort by approximately 40%.
- Automated workflow routing and decisioning processes using declarative and rule-driven processing techniques.
- Supported Agile execution through sprint planning, peer reviews, and technical solution discussions.
- Guided junior developers on reusable architecture patterns, workflow optimization, and Pega development standards.

EDUCATION

Vellore Institute of Technology (VIT), Vellore
Integrated M.Tech in Software Engineering

CERTIFICATIONS

- Pega Certified System Architect (CSA)

ACHIEVEMENTS

- Architected reusable API orchestration frameworks that accelerated onboarding of external integrations by 40%.
- Drove modernization initiatives involving UI Kit to Constellation migration for enterprise-scale applications.
- Identified and resolved critical platform-level limitations within Pega Constellation, improving application stability and user experience.
- Recognized for proactive participation in stakeholder discussions, Agile ceremonies, and enterprise solution design workshops.
