KEERTHI KOLLA

Hyderabad, India | +91-9347599815 | saikeerthi967@email.com

PROFESSIONAL SUMMARY

Consulting-oriented analytics professional with 2+ years of experience supporting enterprise automation, operational reporting, and business process transformation across Healthcare Claims Operations and Financial Services / Dispute Operations domains. Skilled in collaborating with business stakeholders, product owners, and client-facing teams to analyze requirements, triage client issues, define KPIs, and deliver scalable analytics and reporting solutions. Hands-on experience using Excel, Power BI requirement gathering, and Python with Pandas/OpenPyXL for data validation, KPI summaries, workflow insights, and stakeholder reporting. Solid foundation in process optimization, operational analytics, exception management, and KPI tracking.

TECHNICAL SKILLS

Analytics & Reporting: Excel, SQL, Power BI, Python, Data Validation, Process Analytics

Power BI: Dashboard Requirement Gathering, KPI Definition, Data Field Mapping, Report Wire framing, Operational Metrics

Python Analytics: Pandas, OpenPyXL, Excel Data Processing, Dataset Comparison, Data Manipulation

Consulting: Stakeholder Management, Client Ticket Triage, Requirement Gathering, Solution Walkthroughs, Agile Delivery

Domain Knowledge: Healthcare Claims Operations, Dispute Management

PROFESSIONAL EXPERIENCE

Pegasystems - Associate Applications Engineer

Project: Smart Claims Engine (SCE) | Domain: US Healthcare Claims

Aug 2024 - Present | Hyderabad, India

- Partnered with **business stakeholders** and **product owners** to assess end-to-end healthcare claims workflows across intake, pended claim routing, claim status updates, adjustments, claim-line processing, balancing, and exception handling.
- Translated operational needs into scalable **automation, analytics, and reporting solutions** while leading requirement clarification sessions, sprint demos, solution walkthroughs, and stakeholder reviews.
- Managed end-to-end **client ticket triage** by assessing business impact, reproducing scenarios, finding root causes across workflow, reporting, rule-output, and data issues, and coordinating resolution with product, QA, engineering, and client-facing teams.
- Built **Excel-based trackers** for requirement traceability, scenario mapping, rule validation, defect aging, stakeholder feedback, ticket tracking, and test-result comparison.
- Applied **Pivot Tables, XLOOKUP/LOOKUP, filters, conditional formatting, and data validation** to analyze workflow patterns, exception categories, routing queues, ticket trends, and processing statuses.
- Used **Python with Pandas/OpenPyXL** to clean Excel datasets, compare claim-processing outputs, and prepare KPI summaries, root-cause summaries, issue walkthrough notes, and resolution insights for stakeholder reviews.
- Defined **Power BI dashboard requirements** and prepared **Power BI-ready field mappings**, source-to-target definitions, KPI logic, and reporting attributes for claims operations covering pended claims, claim status distribution, exception volumes, workflow aging, ticket trends, and operational bottlenecks.

Project: Smart Dispute | Domain: Financial Services / Dispute Operations

- Supported dispute lifecycle automation use cases covering case intake, transaction validation, **chargeback alerts**, exception handling, response workflows, and dispute resolution tracking.
- Partnered with **client stakeholders** to analyze **Ethoca and Verifi alert workflows** and define business requirements for chargeback prevention, alert handling, pre-dispute resolution, and dispute operations visibility.
- Conducted-requirement discussions to understand how **Ethoca and Verifi alerts** are received, prioritized, routed, assigned, tracked, resolved, and reported across operational teams.
- Mapped end-to-end **alert lifecycle workflows** covering intake, transaction validation, merchant response, exception handling, SLA tracking, and resolution closure.

- Collaborated with product and engineering teams to convert client requirements into solution designs, integration mappings, validation scenarios, and delivery-ready user stories.
- Created **Excel-based consulting artifacts** including requirement trackers, alert scenario matrices, API validation logs, SLA trackers, stakeholder sign-off sheets, and issue-resolution dashboards.
- Defined **Power BI dashboard requirements** for Ethoca / Verifi operations, including alert volume, resolution status, SLA adherence, exception categories, manual intervention, chargeback trends, and aging analysis.
- Prepared **KPI definitions**, reporting field mappings, and dashboard wireframes to support operational reviews and executive-level dispute performance reporting.

EDUCATION

Vellore Institute of Technology (VIT), Vellore
Integrated M.Tech in Software Engineering

CERTIFICATIONS

- **Pega Certified System Architect (CSA)**

ACHIEVEMENTS

- Contributed to analytics-enabled workflow improvements by using **Excel**, **Power BI-ready mappings**, and **Python-based data validation** to support stakeholder reviews and delivery decisions.
- Improved integration delivery efficiency by helping standardize reusable implementation patterns for external dispute services.
- Supported modernization and operational reporting initiatives by translating business needs into structured requirements, **KPI logic**, and dashboard-ready reporting attributes.
- Recognized for active participation in **stakeholder discussions**, **Agile ceremonies**, **ticket triage**, and **solution walkthroughs**.
