SUMMARY

Azure Data Engineer with 13 + years of IT experience in Data Warehousing, ETL, Data Analytics, Cloud Data Engineering, and Reporting solutions. Possesses 6 plus years of hands-on experience in Azure Databricks, Azure Data Factory, Snowflake, DBT, and PySpark. Experienced in designing scalable data platforms, implementing Medallion Architecture, building metadata-driven pipelines, and leading development teams in enterprise environments

Possess knowledge of Generative AI and Agentic AI, with experience delivering a POC for RAG pipelines and tool-calling workflows using Databricks Mosaic AI Vector Search, Delta Lake, embedding models, and LangChain. The POC enabled AI agents to retrieve enterprise information related to purchase orders, suppliers, inventory, and supply chain use cases. Familiar with MLflow for experiment tracking, model versioning, evaluation, model registry, and AI lifecycle management.

EXPERIENCE

Associate Technology Lead / Senior Data Engineer | TCS

July 2024 - Present, Azure Data Engineer

- Designed and implemented metadata-driven ingestion pipelines using Azure Data Factory (ADF) to ingest data from SAP S/4HANA, Salesforce (SFDC), AWS S3, and Azure SQL into Azure Data Lake Storage (ADLS).
- Implemented a scalable Medallion Architecture using Databricks Delta Live Tables (DLT) for reliable ingestion, transformation, data quality, and incremental processing across multiple enterprise data sources.
- Generated enterprise fact and dimension tables within the Gold zone's unified data layer using PySpark and SQL, facilitating analytics, Power BI reporting, and downstream data consumption.
- Managed and observed comprehensive data pipelines with Azure Synapse, concurrently refining Databricks notebooks and PySpark tasks for enhanced performance, scalability, and processing efficiency.
- Optimized query performance by implementing data partitioning, Delta Lake tables, and caching, alongside Spark optimization strategies to decrease overall data processing time.
- Implemented Databricks Unity Catalog for centralized data governance and security by managing catalogs, schemas, tables, and permissions, and applying fine-grained access controls to ensure secure access to data across the lakehouse
- Collaborated closely with business stakeholders and onsite teams to define requirements and deliver technical solutions.
- Developed Agentic Al solutions on Databricks using LLMs, RAG, Vector Search, and PySpark to analyze supplier, inventory, demand, and PO data.
- Built Al agents for PO management to track PO status, identify delays, monitor suppliers, and handle procurement exceptions.
- Integrated MLflow for model tracing and registry, enhancing AI solution development and deployment on Databricks..

Technology Lead / Senior Data Engineer | Infosys

October 2016 - July 2024, Client: Leading Retailer

- Developed metadata-driven ETL/ELT pipelines to ingest and process data from multiple source systems into Azure Data Lake for enterprise analytics and reporting
- Built and managed Azure Data Factory pipelines to extract data from on-premises relational databases and generate structured flat files for downstream processing
- Developed scalable data processing frameworks and transformation logic using PySpark in Azure Databricks to acquire, cleanse, and transform large datasets from diverse data sources
- Automated and scheduled end-to-end data integration workflows, enabling daily extraction, transformation, and loading (ETL) of delta data intodimensional and fact tables
- Migrated legacy Informatica mappings to cloud-native

Senior Software Engineer | United Health Group

July 2013 - August 2016

Technology Analyst | INFOSYS

April 2011 - June 2013

EDUCATION

Bachelor of Technology Computer Science and Engineering

| University College Of Engineering, Kakatiya University

CERTIFICATIONS

Databricks Certified Data Engineer Professional

Certified Databricks Data Engineer Associate

Databricks Certified Generative AI Engineer

Certified Microsoft Azure data fundamentals (DP-900)

SKILLS

Databricks. Azure Data Factory. PySpark. SQL. Delta Lake. Delta Live Tables. Unity Catalogue. DBT. Python. Snowflake. Power BI. Microsoft Fabric. Azure DevOps (CI/CD)

RAG Vector search. LangChain(Agents, Chains, Tools). MLflow(Tracing, Model Registry)

Oracle EPM Technologies
